

CHECK BRAKES CONTINUOUSLY

EBPMS

More safety. Maximum braking control.

Brakes are critical to safety – yet conventional tests only provide a snapshot of their condition. With EBPMS, braking performance is continuously monitored whilst the vehicle is in motion and assessed using software. Integration with the maintenance schedule enables automated, needs-based testing and maintenance. This ensures vehicles remain roadworthy, reduces downtime and significantly increases transparency within the fleet.

More safety: EBPMS continuously monitors braking performance under real-world operating conditions.

- Continuous monitoring instead of one-off checks
- Early detection of performance deviations
- Greater road safety in fleet operations
- Digital records and documentation
- Monitor brakes before the situation becomes critical

Smart maintenance: From reacting to taking proactive action.

- Automatic alerts in the event of poor braking performance
- Maintenance based on actual needs rather than fixed inspection intervals
- Targeted workshop planning
- Fewer unplanned downtimes

Full transparency: Every trailer. Every braking. Always under control.

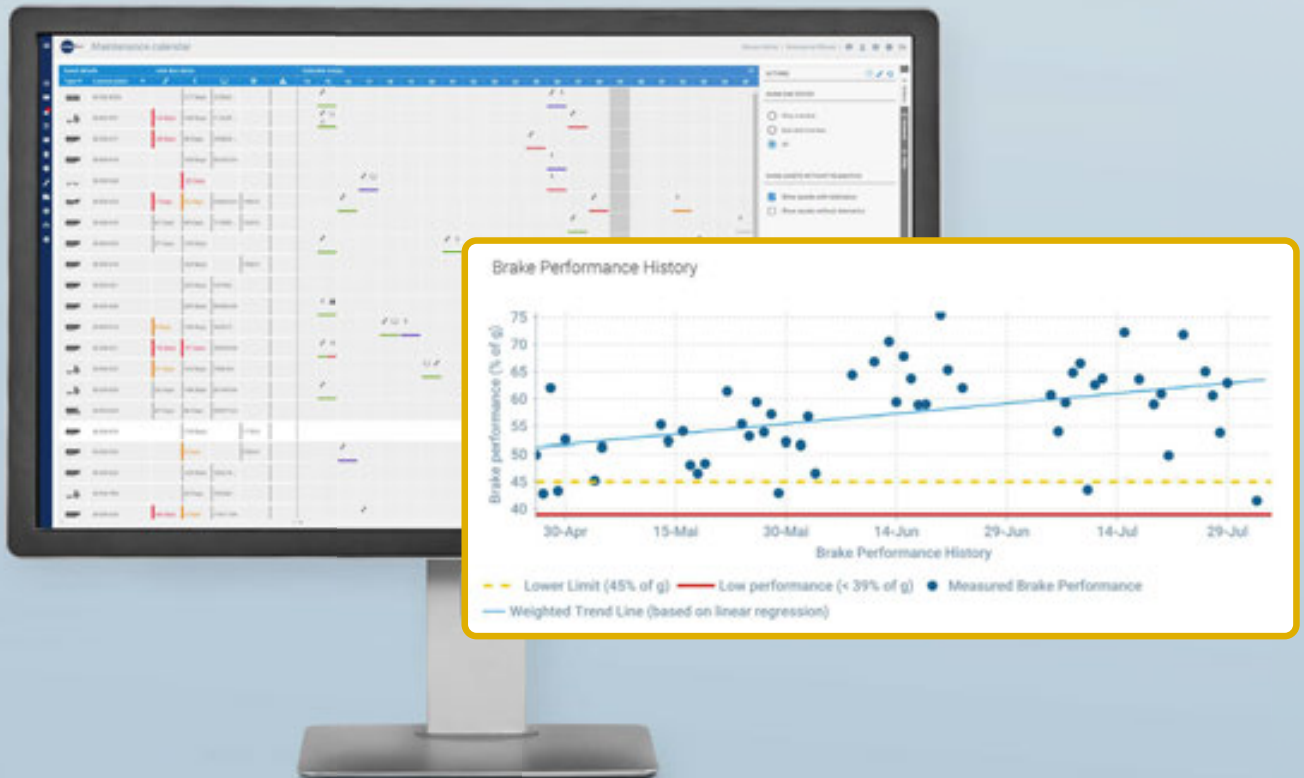

- Automatic reports
- Documented testing processes
- Transparent braking performance
- Digital records for operators and authorities

Efficient fleet operations: Greater safety. Less downtime.

- Higher vehicle availability
- Optimised workshop visits
- Integration with the cargofleet 3 maintenance calendar

Reduced workshop visits with increased safety.

Benefits at a glance

- ✓ Greater safety for drivers, vehicles and cargo
- ✓ Detect braking problems before they become critical
- ✓ Plan maintenance effectively
- ✓ Increase vehicle availability
- ✓ Reduce downtime
- ✓ Digital records at the touch of a button
- ✓ Fully integrated into cargofleet 3
- ✓ The digital early-warning system for trailer brakes

**AUTOMATISED
LEGALLY COMPLIANT
TRAFFIC SAFE**

About idem telematics GmbH – connecting all road transport

As Europe's leading brand-independent telematics partner, idem telematics supports freight forwarders, fleet operators and shippers in continuously optimising their core business using data – thereby sustainably increasing profitability, customer satisfaction and competitiveness.

At the same time, idem telematics is a strong and independent partner for vehicle manufacturers, supporting them with modular telematics solutions.

Our solutions can be easily integrated into your existing systems. They are manufacturer- and fleet-agnostic and suitable for businesses of all sizes and business models. Our process consultants will be happy to assist you – even on-site!

Our range of services includes a wide variety of hardware and cargofleet3, Europe's leading all-in-one telematics platform for trucks, trailers, freight and logistics. The intelligent networking of freight, drivers and vehicles creates a holistic system that ensures maximum transparency and increases efficiency throughout the entire logistics chain.

Our customers value our strong customer focus and high flexibility in meeting individual requirements, based on over 25 years of experience in telematics, transport and logistics.

idem telematics is a subsidiary of the BPW Group.
