AVAILABILITY.

MAINTENANCE CALENDAR

Proactive maintenance. Reduce downtime.

The digital maintenance calendar in cargofleet 3 combines telematics data with maintenance planning for the entire fleet. Maintenance cycles are automatically assigned, monitored and calculated based on current mileage, operating hours or time intervals. Upcoming maintenance and inspections are highlighted in good time, enabling workshop appointments to be scheduled promptly and downtime to be reduced.

Even short-notice events triggered by telematics alerts are taken into account. All scheduled workshop visits are available to the dispatch team and can be factored into route planning – even for assets without a telematics unit. This ensures high vehicle availability and optimally organised maintenance.

Keep track of maintenance

- Overview of all vehicles and assets
- Centralised management of all maintenance schedules
- Transparent maintenance history and documentation

Your introduction to predictive maintenance

- Brake Performance Monitoring/EBPMS provides early information on deteriorating brake performance and the need for inspection
- Anomaly detection identifies hot and cold runners and helps to identify problems
- Maintenance based on actual requirements

Less unplanned downtime

- Maintenance interventions based on telematics data
- Early detection of the need for action
- Targeted planning of workshop visits

Never miss maintenance again

- Maintenance schedules based on time, mileage or operating hours
- Early reminders and alerts
- Keep track of statutory inspections with confidence

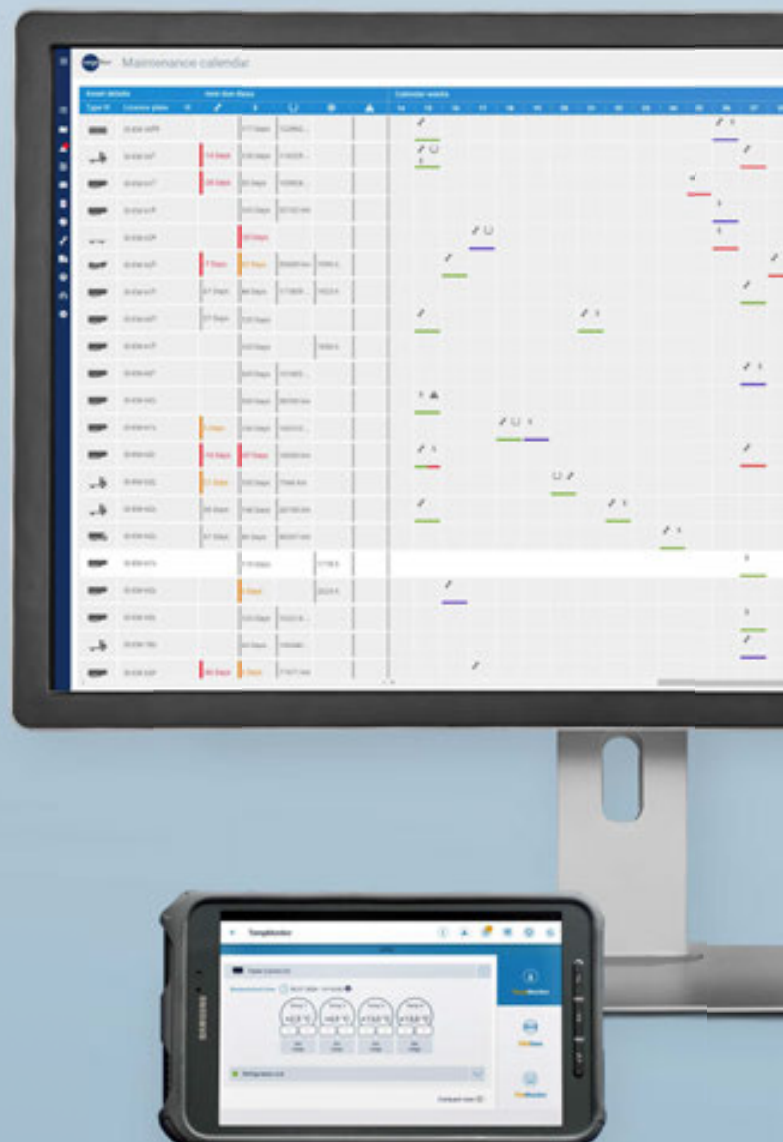

From reactive to predictive maintenance

The maintenance calendar turns maintenance into a strategic management tool. By linking maintenance planning with telematics data, you create transparency, reduce downtime and increase your fleet's operational readiness.

SAFE
READY-TO-USE
PROFITABLE

Your benefits at a glance

- ✓ No backlog of maintenance
- ✓ No missed inspections
- ✓ Fewer unplanned workshop visits
- ✓ Documented maintenance history
- ✓ Transparent, digital processes
- ✓ Higher vehicle availability

About idem telematics GmbH – connecting all road transport

As Europe's leading brand-independent telematics partner, idem telematics supports freight forwarders, fleet operators and shippers in continuously optimising their core business using data – thereby sustainably increasing profitability, customer satisfaction and competitiveness.

At the same time, idem telematics is a strong and independent partner for vehicle manufacturers, supporting them with modular telematics solutions.

Our solutions can be easily integrated into your existing systems. They are manufacturer- and fleet-agnostic and suitable for businesses of all sizes and business models. Our process consultants will be happy to assist you – even on-site!

Our range of services includes a wide variety of hardware and cargofleet3, Europe's leading all-in-one telematics platform for trucks, trailers, freight and logistics. The intelligent networking of freight, drivers and vehicles creates a holistic system that ensures maximum transparency and increases efficiency throughout the entire logistics chain.

Our customers value our strong customer focus and high flexibility in meeting individual requirements, based on over 25 years of experience in telematics, transport and logistics.

idem telematics is a subsidiary of the BPW Group.
